**Flag:** Follow up

I'm fine not participating but keep me posted, Leif mentioned this in staff meeting.

FYI, let me know if either of you want to sit in on this meeting tomorrow afternoon and I'll forward the invite. There were a bunch of email exchanges last week (while we were all out) between Martha and Chelsea about this ARAR table.

Please see the attached ARARs table with Susan's comments. The final signed decision includes the following footnote (highlight added):

24 While the DOE does not appear to be challenging the "applicability" of these same CWA regulations to pollutants (e.g., mercury), certain requirements were inadvertently omitted from the FFS that may also be applicable to setting PRGs for the discharge of pollutants, and the FFS must be revised to include these omitted regulations. My staff will provide you shortly with a table that identifies the EPA and Tennessee CWA NPDES regulations applicable to CWA pollutants to be added to the existing ARARs/TBC tables in the Wastewater FFS.

Susan removed all other references to the ARARs table in the decision due to the need for further discussion. She expects to send a final table over to DOE this week. Please feel free to forward the invitation to anyone I missed.

Thank you.

Chelsea
